TOOL 1 OF 4

Start Here

A one-page map. Find the guide that fits you first, then use the other tools to make the most of it.

If this sounds like you...	Read first	Then
“My belly will not budge, and I eat well.”	**The Belly Fat Lie**	Aging Faster
“I look older than I feel, and I am worn out.”	**Aging Faster Than You Should**	The 3AM Signal
“I slept, and I am still tired. I live on coffee.”	**The Caffeine Trap**	The 3AM Signal
“I wake up at 3AM and cannot fall back asleep.”	**The 3AM Signal**	The Caffeine Trap
“All of the above.”	**The 3AM Signal** (sleep affects the rest)	Then the others in any order

How to use the pack

1. Read **one** guide. Do not read all four in a weekend.
2. Pick **two** changes from it. Do them for two weeks.
3. Fill in the **14-Day Body Log** (Tool 2) every day. It takes 30 seconds.
4. If you are still not right after 2 to 4 weeks, fill in the **Doctor’s Brief** (Tool 3) and take the **3 Questions** (Tool 4) to your visit.

Do not wait if...

You have chest pain, trouble breathing, fainting, sudden severe belly pain, or a very fast or irregular heartbeat that does not settle. Get urgent care. These tools are not for emergencies, and nothing here is medical advice.

TOOL 2 OF 4

14-Day Body Log

30 seconds a day, at night. Rate each from 1 (worst) to 10 (best), except bloating (1 = flat, 10 = very tight). Patterns show up around day 7.

Day	Sleep (hrs)	Woke at night?	Energy	Bloat	Mood	Caffeine (cups)	Notes (skin, hair, food, period)
1							
2							
3							
4							
5							
6							
7							
8							
9							
10							
11							
12							
13							
14							

What I see after 14 days:

TOOL 3 OF 4

Doctor’s Brief

One page. Fill it in before your visit and hand it over. Doctors have a few minutes. This gets you heard.

Name and age	
My main concern (one line)	
When it started / how often	
What makes it better or worse	
Sleep (hours, waking at night?)	
Energy (1–10), and when it dips	
Caffeine and alcohol per day	
Belly, skin or hair changes	
Periods / menopause changes	
Medicines and supplements	
Family history that matters	
What I have already tried	
What I want from this visit	

Attach your 14-Day Body Log. Bring a list of any tests you have had before and their dates.

TOOL 4 OF 4

3 Questions For Your Doctor

Write down the answers. If you do not understand, say: “Can you say that in plain words?” That is always allowed.

1. What could be causing this, and what else should we rule out?

Why it matters: it makes your doctor name more than one possibility instead of “it is just stress” or “it is your age.”

2. Which tests make sense for me, and what will the results tell us?

You can ask about things like thyroid (TSH), iron stores (ferritin), blood sugar (A1C), or a sleep study. Ask which, if any, apply to you, and what a “normal” result means.

3. What should I try first, what should I track, and when should I come back?

Ask which warning signs mean you should call sooner, and when your next visit should be.
